Detailed Action

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,7,8,13, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Sugimoto et al (USPN 5,824,920).

3. Regarding Claims 1,7,13, and 20, Sugimoto et al shows (Figs. 1-9) a head flying height measurement apparatus comprising: a disk (2) having a plurality of protrusions (Fig. 4 - P) with a height greater than an estimated flying height (f2) of a slider formed on a surface of the disk; a head assembly (Fig. 1; Col 4, lines 3-14) of a disk drive having a magnetic head and a slider (22) disposed at an end of the head assembly, wherein the slider floats above the disk when the disk is rotated and cuts the protrusions to leave a portion of each protrusion below a bottom edge of the slider on the surface of the disk (Figs. 4 and 5 – head vanishes where protrusions are cut); and a measurement device (Fig. 6; Col 6, lines 11-34) , wherein the measurement device measures a height (f1-f5) of the portion of the protrusions remaining on the surface of the disk that corresponds to a flying height of the slider (See graphs in Figures 5A and 5B).

4. Regarding Claims 2 and 8, Sugimoto et al shows (Figs. 1-9) the head assembly is a magnetic head assembly and the disk is a magnetic recording disk (Fig. 1; Col 4, lines 3-14).

Allowable Subject Matter

5. Claims 3-6,9-12,14-19,21, and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
